

BEA WebLogic® Server

BEA WEBLOGIC SERVER,™ THE #1 WEB AND WIRELESS APPLICATION SERVER, DELIVERS SCALABILITY, FLEXIBILITY, AND RELIABILITY TO POWER THE WORLD'S MOST SOPHISTICATED E-BUSINESS APPLICATIONS.

Overview

Today's business environment demands a new breed of Web and wireless applications that will accelerate your entry into new markets, help you reach and retain customers, and streamline operating efficiency. To power those applications, you need the proven WebLogic Server. As the foundation of your e-business architecture, WebLogic Server will reduce your time-to-market, provide mission-critical high availability, and support exponential growth.

The award-winning WebLogic Server—based on the most advanced implementation of the Java 2 Enterprise Edition (J2EE)—powers many of today's most sophisticated e-business applications. WebLogic Server plays an integral role in the BEA WebLogic E-Business Platform,™ a comprehensive infrastructure that delivers commerce, personalization, enterprise integration, workflow management, and business-to-business collaboration. From Web and wireless clients to NT, Unix, and mainframe servers, WebLogic Server manages all of the underlying complexities of your applications, allowing you to focus on delivering new and innovative products and services.

Benefits

Leverage the de facto standard application server used by more developers, independent software vendors (ISVs), application service providers (ASPs), and system integrators (SIs) than any other platform.

Get to market faster with BEA WebLogic Server's certified J2EE services and a wide range of tightly integrated development tools.

Empower your enterprise with the server driving the most demanding business logic, user load, and transaction-intensive Web applications.

Go wireless by accessing the same business logic from both Web and mobile clients.

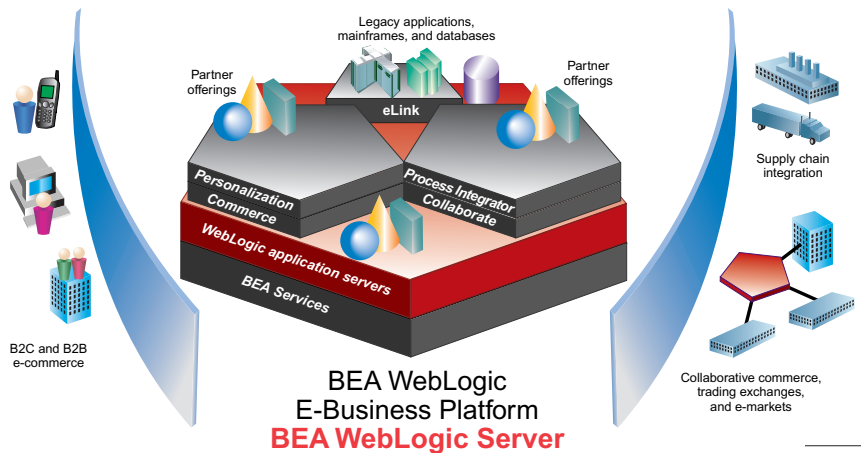

Grow your business by utilizing sophisticated clustering for high availability and scalability.

Deploy with confidence on BEA WebLogic Server's reliable, secure, and manageable foundation, proven with the most global customers in large mission-critical e-business deployments.

Customers

First USA uses *WebLogic Server* for its high-transaction environment, providing customers online access to their account information to view statements, check available credit, and make payments online. *First USA* customers find it faster and more convenient to use these self-service capabilities, and employees can now deliver higher quality service because they can spend more time solving unique customer problems.

Fujimic, Inc. of Tokyo, an affiliated company of *Fuji Television Network, Inc.*, has implemented *WebLogic Server* to power its wireless subscription service and offer content-on-demand. Called *Fuji Televi*, the new service is based on i-mode technology from *NTT DoCoMo*, the mobile communications subsidiary of *Nippon Telegraph and Telephone*.

Companies, such as *Deutsche Bank AG*, *Federal Express*, *Bank of America Securities*, *First USA*, *Northwest Airlines*, *British Telecom* and *United Airlines* all count on *WebLogic Server* to power their e-business initiatives. In addition, hundreds of ISVs, such as *Blue Martini* and *Loudcloud*, are developing next-generation e-business applications built on *WebLogic Server*. If you have tracked shipments, checked your stocks, made a flight reservation, or purchased just about anything online, you have used *BEA WebLogic Server*.

About BEA

BEA Systems, Inc. is one of the world's leading e-business infrastructure software companies, with over 8,000 customers around the world including the majority of the *Fortune Global 500*. *BEA* and its *WebLogic®* brand are among the most trusted names in e-business.
